A small, happy dog with brown and white fur is sitting up, looking towards the camera with its mouth open. A person's hands are visible, holding one of the dog's front paws and using blue-handled nail clippers to trim its nails. The background is a warm, orange-toned wall with decorative floral patterns in the corners.

Toenail trim?
Pills? Vaccines?
No problem.

Simple, effective training methods – **Online!**

Your pet can learn to enjoy toenail trims, grooming, veterinary visits, and more. The key is simple behavior modification, and the techniques are available online at

drsophiayin.com/lowstress/online

Purchase 30 days of online access to **Low Stress Handling and Behavior Modification of Dogs & Cats** for \$25.

You'll read about how to:

- Put a stop to the stress you and your pet feel during your veterinary appointments.
- Understand why pets behave badly and what to do.
- Learn the human body signals that will put your pet at ease.
- Train cats and dogs to love getting pills, injections, veterinary visits and more.
